

TelemediQ Neurology Consult

Staff will now need to launch the TelemediQ Neurology Consult from within Epic.

PLEASE NOTE: You must now go through Epic as you will no longer be able to launch it through the internet/intranet browser.

Try it out:

1. Log into **Epic**. Open the pt's. chart you want the consult on.
2. Select the **More activities** tab arrow (located next to the wrench), the SOC Telemed activity for your Campus will appear at the bottom of the list.

3. Once you select the **SOC Telemed activity**, the page will launch in an external browser (Internet Explorer).

4. The TelemediQ Request window will open.

5. Select the **Inpatient Routine** button for **admitted patients** or **Emergency Non-Stroke** for patients in the **ED**, and it will open to the applicable consult request form to be completed.

NEW REQUEST

UAT (TEST PATIENTS ONLY)

- The consult request form will auto populate many fields based on the data pulled in by SOC Telemet. **Verify** the appropriate fields information is correct and **complete** the rest of the form.
- Select the **SUBMIT** button on the bottom right of the page.

Note Type from Telemet:

Telemet IQ will send a **Consults** Note Type to complete their note. This will be sent over automatically and will integrate into Epic. It can be found under the **Notes Activity > Consults** tab in the patients chart. It could also be found in **Chart Review > Notes** tab.
