GLUCOSE	112	H	70-110 MG/DL
BUN	15		7-18 MG/DL
CREATININE	0.82		0.55-1.30 MG/DL
CALCIUM	8.7		8.5-10.1 MG/DL
SODIUM	139		134-146 MMOL/L
POTASSIUM	2.9	L	3.3-4.7 MMOL/L
CHLORIDE	101		97-108 MMOL/L
CO2	31.0		21.0-32.0 MMOL/L
GFR	> 60.0		60.0-120.0 ML/MIN

The Glomerular Filtration Rate result is an estimation only and is based on the calculation used. The calculation used is most sensitive at eGFR levels less than 60 ml/min/1.73 m². At this level, calibration discrepancies are less likely to have a significant impact on the estimated level of GFR or on the stage of chronic kidney disease. It is not suitable for patients less than 17 years of age or for patients receiving dialysis therapy. Results may deviate from true GFR values with extremes of body composition or dietary intake or severe liver disease. For African Americans multiply the result by 1.21. Normal eGFR varies according to age, sex and body composition.
