Area (m²): 2.25

Emetic Level
☐ Minimal
☒ Moderate
☐ High

Lab Orders: ☒ CBC/DIFF

☒ CMP

Magnesium

UA

Hold Parameters:

ANC less than: 1500 WBC less than: 3.0 PLT less than: 95 Hgb/Hct less than: 8.5 Scr greater than:

Non-chemotherapy orders:

☐ IV Fluids: NS @ KVO (20 mL/hr)

RPh Initials / Nurse Initials

Rehydration: 500 cc NS over 60 min

Erend 150 mg IV

Ordansetron 16 mg IV

Decadron 10 mg IV

Posthydration: 500 cc NS over 60 min

Solution, volume and infusion rate are per manufacturer/hospital guidelines unless otherwise specified. Chemotherapeutic agents will be rounded down to nearest vial size if within 5% of calculated dose. Biological agents will be rounded down to the nearest vial size if within 10% of calculated dose. Please administer chemotherapy in sequence listed below.

Chemotherapy	Dose per Unit (m ² , kg, AUC)	Dose Reduction* (mg/m ² , mg/kg, AUC)	Calculated Dose	Dose Dispensed (Rounding to be completed by RPh)	Route	Infusion Rate	RPh / Nurse Initials
Cisplatin	40 mg/m ²		90 mg		IV	90 min	

*If using a dose reduction, please provide rationale:

CHIEF COMPLAINT: cervical cancer

HISTORY OF PRESENT ILLNESS: 80 y.o. female with PMH as below here to establish care with oncologist for treatment of locally advanced cervical cancer. She initially presented with postmenopausal bleeding. An irregular cervix was noted on GYN exam by Dr. Levine. Pap was performed in the office on December 9, 2018 and revealed CIN-2 and CIN-3/CIS. She was referred to gyn onc Dr. Marie Welschinger in Paramus, New Jersey. A cervical biopsy was obtained on December 31, 2018 which revealed diffuse involvement by in situ and infiltrating keratinizing squamous cell carcinoma. She was felt to have at least clinical stage IIA disease given the extension of the tumor into the vaginal wall. A PET/CT was performed and was negative for metastatic spread. A hypermetabolic focus in the cervix was seen. She continues to have postmenopausal bleeding. Complains of fatigue. Was feeling dizzy but this has resolved after starting oral iron. She was seen by Dr. Eanelli and is scheduled to have a CT simulation next week.

ASSESSMENT AND PLAN:

Stage IIA invasive squamous cell carcinoma of the cervix - will treat with primary chemoradiation using weekly cisplatin 40 mg/m².

Fatigue - must consider possibility of iron deficiency anemia secondary to ongoing postmenopausal bleeding. Will check CBC and send anemia work-up including iron studies

Orders Placed This Encounter

- * CBC WITH AUTOMATED DIFF
- * METABOLIC PANEL, COMPREHENSIVE
- * IRON PROFILE
- * FERRITIN
- * VITAMIN B12
- * FOLATE

	ICD-10-CM	ICD-9-CM	
1. Malignant neoplasm of cervix, unspecified site (HCC)	C53.9	180.9	CBC WITH AUTOMATED DIFF
2. PMB (postmenopausal bleeding)	N85.0	627.1	METABOLIC PANEL, COMPREHENSIVE IRON PROFILE FERRITIN VITAMIN B12 FOLATE

Follow-up and Dispositions

- Return in about 4 weeks (around 2/14/2020).
